

Industrial LoadSense motor

Features

- Direct drive torque up to 9 Nm
- Analog and digital inputs and outputs
- CANopen standard DS-301, DS-402, DS-305
- Industrial Ethernet and wireless upon request
- IP65 / IP67 water and dust resistant
- -40° to 85°C operating temperature
- Standard NEMA 23 and 34 size
- Integrated electronics compatible 24-48V
- Fault tolerant operation
- Over temperature protection
- Over torque protection upon request
- Real-time torque estimation upon request
- Low noise / low vibration
- High precision speed / position control

Benefits

- Flexibility for embedded customized software
- Gearless - long service life
- No additional driver and control system required
- Suitable for intermittent movements
- Reduced energy consumption due to intelligent motion control
- Easy to integrate thanks to compact design
- Suitable for in- and outdoor environment

Sonceboz mechatronics drive systems: Our focus on innovation, best in class quality and exceptional service is our key to success for world-wide OEM customers and their suppliers.
